▣ ABANDONED by @dichotom ▣ Conquering the Dragons by @iONGiS\_\_ ▣ Elonea's Guide to Upgrading by @Elonea ▣ Let's Talk About Strategy and RPG by @kuril ▣ Pick the Feathers by @kuril • Showing up, an iRagRago-developed MMO (multiplayer online game) for PlayStation Vita (PS Vita) recently announced.

Aiming for release in the spring 2016, three new screenshots have been revealed, and here comes the introduction. New Story ▣ The Lands Between You live in a fantasy world that rests at the intersection of three different dimensions. In the Lands Between, you, the heroes of this world, can freely explore the vast landscape or the vast dungeon. • A large world with open fields and dungeons As in other RPG games, the current world, comprising three dimensions, is a large world. You can freely explore the vast landscape or the vast dungeon. ● Action There is a variety of action scenes to enjoy. In addition to melee and weapon attacks, there are also special attacks that make you shine when playing the game. ● Time of Attack In an action game, there is usually a long time between the attack and the attack. In the game, there is also a time limit, for instance, to evade the attack of an enemy. ● Creep ▣ Stun Stun is an evasion that cancels the effect of an enemy attack on you. The player-character also cannot perform any actions for a certain period of time after being attacked. ● Critical ▣ Critical Critical is the effect of a certain critical hit in real time. Unlike in other action games, the more you play, the better your chances of getting a critical effect. ● Sweep ▣ Sweep Sweep is the effect of a critical hit. While your character is taking damage, you can execute a special attack to gain points, and then use the points as the effect of a special attack. ● Magic There are variety of special attacks such as magic. Players can equip and use magic by using mana, which is the recovered after effect of bff6bb2d33

When I send a notification, it should appear in the notification tray. Now it should appear as a program that can be run by anyone, not just me. So I need to know how to read the notification tray, the only way I can think to know if the notification tray is there is to see if a pop up window comes up asking if the notification should be displayed. Now if it can be read programmatically, I know this can be done, but I don't know how to do it. The reason for this, is
