An online game based on the Elder Scrolls franchise and developed by Arkadium. Based on the tradition of multiplayer games in the Elder Scrolls franchise, the setting of the game is the land of Skyrim. The game is set in a distant future in the Lands Between, a mysterious realm where the power of the Elder Scrolls - the legendary divine artifacts that once guarded peace, order, and prosperity for the people of Tamriel - was abandoned centuries ago. The Lands Between was once a glorious and majestic land of peace, but with the deterioration of the well-being of its residents, it now shines with the hollow glitter of despair and rot. The inhabitants, known as "Elden," perform meaningless rituals and keep their hopes up in their own folly, but the world of the Lands Between is the realm of nightmares. As the people of Tamriel began to tire of an endless cycle of war, mistrust began to spread among them. Then, out of the dust and turmoil, a mysterious, powerful force rose up and swept away all the deceit and despair. The game is set in this distant future in the Lands Between, where the world is ultimately governed by a new power. A power that brings light and peace to those it touches. Our adventure begins as the player character is arrested in the act of murder. The police chief interrogates the character to determine who they are and what they are doing. From this point the player will travel on an adventure that will test their wits, and their strength and courage. The player character can be male or female, and their appearance will be decided upon when they choose their starting statistics. If you choose an appearance that is consistent with the looks of the character in the base game, you will most likely look much less "skyrim-like." Players can freely travel between the first person adventure mode and the character drawing mode. Players are free to customize their character in multiple ways to make them perfectly fit their play style. Rise up and begin your epic adventure! The in demand Depth of Field plugin is one of the most popular companion tools for video tutorials. When applying the quality, the plugin's various parameters are adjusted until it's at its peak. If you want to know how the quality level is set, don't hesitate to read the DFO article in detail.

What's different with the plugin is that Greensock didn't just create another way to set volume, the focus isn't on just flattening the video so it looks clear. You actually set the distance from focus and thus the well-defined polygon appears as a blurred circle.

The real purpose of the plugin, as defined by the author, is to make your videos interesting. It
