Magic RDS Crack PC/Windows

Magic RDS Torrent Download is a powerful and easy to use, multilingual program for the radio station. It allows you to write a song and bring it to the air. To use Magic RDS you need to download a song file and a Magic RDS encoder file. The song information (e.g. ID3 tag) is read from a periodically updated file and sent to your listeners in different ways. It allows you to run directly from Windows Explorer, control directly from the RDS encoder, or to execute a script file. The "Now Playing" feature has many systems: Record, save or play from the list files, easy to use, dynamic text or you choose your own DMI. In this release, RDS protocol support is added. Now you can receive your MP3, TIN, TDA, ADIF, PS, EON, OBA, DI, ECC, TMF encoded songs over RDS. Magic RDS now supports: PI-RDS service supported: PI-EON, PI-PS, PI-T, PI-TOCP, PI-TP, PI-DI PTY-RDS service supported: PS-PTY, PS-CSC, PS-CR, PS-DMI, PS-OTZ, PS-TIN, PS-TOCP, PS-TPAF, PS-TPAF, PS-TPAF, PS-TPAF, PS-TPAF, PS-TPAF, PS-TPAF TP-RDS service supported: TP-EON, TP-PS, TP-T, TP-TPAF AF-RDS service supported: AF-CSC, AF-CR, AF-CPC, AF-CPCP, AF-CPC, AF-CPC, AF-CPC, AF-CPC, AF-CPC, AF-CPC DI-RDS service supported: DIN, DION, DIO, DIR, DI, DI M/S-RDS service supported: MMS, MMS, MMS, MMS, MMS, MMS

Magic RDS Crack (Latest)

"Magic RDS Crack Mac" is an old friend for radio control software when the radio station's PC was in a basement of a station with no internet. Nowadays this scenario is obsolete. When PC music on the web, computers can easily read and write id3 tags of their files and other personal information. "Magic RDS" transfers the radio traffic to your station computers over the internet. Bid with your listeners to "rass up" the most creative station. "Magic RDS" will get you the hottest songs in every genre and niches. "Magic RDS" will add value to your broadcasts offering a bonus to your listeners. Why RDS? Because you run your radio station in multi-users mode and the station software are distributed to listeners remotely via internet. "Magic RDS" takes care of the scheduling of music in your broadcasts. In the beginning of WWW radio stations were broadcast on a single radio station by most of the radio stations in the world. Back in 1997 RDS arrived for live broadcast radio stations. But by that time VTRs, radios and PC have more than 25 years with Internet already. With RDS and "Magic RDS" the future has a better look. RDSPack Description: "RDSPack" is a software tool for downloading and reading the Radio Data System (RDS) information from your recordings. The software supports many different encoding schemes for standard RDS broadcasting and it reads the information from many RDS compatible audio files. With "RDSPack" you do not need any external device to read the information from recordings or files. With "RDSPack" you get an easy to use software tool. The buttons on the screen are easy to use and precise to fulfill your needs. Special Features: - Windows file (*.rds), text (*.txt), Image (*.bmp) reading - CSV file viewing, graphing - Script to process text file - Can open up to 8 of your own RDSPack files - Recording Time Display - Selection of Radio Frequencies to Process - Many other features General Features - Support for RDS (Radio Data System) - Support for: - PI RDS (Program Indication Radio Data System) - PS RDS (Program Specific Radio Data System) - PTY RDS (Program Type Radio Data System) - PSN RDS (Program Specific Network Radio Data System) - ENA R a69d392a70

Magic RDS Crack + With Keygen Download X64

Magic RDS is a plug-in for Windows. It reads a text file updated continuously to display station information (live) on your RDS system. The information is displayed on your Winamp win, on your Window PC, on every RDS game project and it is also visible on all Jazler II or Raduga II/III with PI-RDS auto-update on-the-fly. The text file can be any file you want to use with Magic RDS. Magic RDS is an ideal solution to broadcast station id's (RDS), which can be defined by the song information in Magic RDS. And what is the advantage of Magic RDS in this respect? It is quite simple: No time consuming export/import of your RDS layout. The "Magic RDS" file is reading from a constantly updated file to display stations information and song information. Magic RDS Preview: Magic RDS is a plug-in for Windows. It reads a text file updated continuously to display station information (live) on your RDS system. The information is displayed on your Winamp win, on your Window PC, on every RDS game project and it is also visible on all Jazler II or Raduga II/III with PI-RDS auto-update on-the-fly. The text file can be any file you want to use with Magic RDS. Magic RDS offers 2 powerful tools to display the song information in your Listners. Magic RDS is the song title and the song artist to you listener. You have the option to select the song artist as well to specify what songs this artist writes. On the right side you can open the songs text file. The "Magic RDS" function is on with one click directly on the Winamp application with all song information in the Listers. You have the chance to add the song titles of every file into your player. Your listeners can now see every song of your station with it's title and artist at one glance. With "Magic RDS", you can set your favourite "Now Playing" feature. Here you can modify every single station or groups of stations in your Radioshop. You can create your own station presets for every station or group of stations. Every single station has 4 stations presets. Every single station has the following name: (Name, Prefx, Subgenre, Preset 1) "Name" is the name of the song title of the station. Prefx is

What's New in the?

When used with Absolute RDS this program will allow the transfer of the RDS traffic directly from your radiostation to your internet server or your ISP. Note: Every RDS sources that are supported are the following RDS sources: PI, PS, PTY, PTYN, TP, AF, TA, DI, M/S, PIN, ECC, RT, TDC, IH, ODA, CT, EON. The RDS PTY source is not supported by this version. This application allows you to schedule the transmission of your radiostation to your internet server or your ISP at set times or you can provide a set-up time for each RDS source for each day or each week, month, etc. Using a text file you can create a list of these times. After that the RDS to your listeners will be automatically scheduled at the set-up times. You can also add other RDS sources and then you can schedule the traffic that you want to be transmitted. Using a text file you can also script what happens when you press the "Next" button on your receiver. If you have any software like KWxpress Pro or a Windows Media Player that can read RDS streams directly, then it can be used with absolute RDS. Therefore it is possible to transmit, without sending over the internet, over a LAN or from your radiostation to your friends or to the internet. Magic RDS Version 3.3: Fixed: You can now use the function "Auto" to load the specified RDS sources. Fixed: You can now use the function "URL" to enter the URL of the RDS servers. To use the function "URL" you have to install the Windows SDK. Fixed: The function "Auto" now updates the settings of the RDS source automatically. Fixed: The next song will now be played directly without a break. Fixed: You can now press Enter after you have selected a list-entry to bring up the next RDS entry. You can press Esc to cancel the input. Fixed: A more easy to understand window-layout. Fixed: Minor changes. You can select "Next" when you have a list-entry. Select "Prev" if the result of the "Next" is not found. Select Exit if you don't want to select a list-entry. This application will select the next list entry automatically. Simple R
