AutoCAD Torrent Download is available as both an enterprise and as a personal use application. A license for either of these types of AutoCAD Activation Code is available to the individual at a cost of \$1,500 to \$12,000 per year. AutoCAD is also available through subscription services at a monthly rate of \$8.99 to \$39.99 per month. AutoCAD has been commonly used as a diagramming and drawing tool for the design and construction of all types of buildings and structures. AutoCAD was the first commercial application to include parametric modeling, parametric constraints, intelligent guides, and direct editing, allowing the creation of architectural designs on the move. AutoCAD 2010, released in September 2010, added new features, including 2D and 3D DWG, STEP and IGES support, KML/KMZ/GeoTIFF, SVG support, and the ability to print directly to a printer. History AutoCAD was originally developed in 1981 by Michael Sproule, who later founded Autodesk. The first version was a two-dimensional drafting program for the CDC 1620 minicomputer, as a competitor to CAD software such as Apollo Professional. The early program ran on a monitor with a 640x480 pixel resolution. In the early 1980s, the PC was introduced, leading to the development of AutoCAD for the desktop computer, with its own application window. AutoCAD soon became the dominant CAD program for the desktop, replacing many of the competing drawing programs (including TurboCAD). The first commercially available AutoCAD was version 2.1, which was released on December 15, 1982. At the time of its release, version 2.1 only supported the 1620 and the Psion 4, but versions 2.1, 2.1b, and 2.1e were released for the 1620 and Psion 3. AutoCAD 1.0 for the IBM PC was released in April 1983. An alpha version of AutoCAD 1.5 was released for the Apple Macintosh in 1983. A version of the program for the Hewlett Packard HP-6700 was released in 1984. AutoCAD 2.0 was released in February 1985, and supported both IBM-compatible PCs and Apple II+ computers. The first version of AutoCAD for the Apple Macintosh, version 2.0b, was released in April 1985. An alpha version of AutoC
